SOFTWARE ENGINEER | FULL STACK DEVELOPER

Summary:

Motivated and growth-oriented Software Engineer with a strong passion for building efficient, user-centric applications across both frontend and backend ecosystems. Skilled in applying logical problem-solving, clean coding practices, and modern development tools to solve real-world challenges. Demonstrates a strong learning mindset, adaptability to emerging technologies, and the ability to leverage modern platforms including AI-driven solutions. Effective collaborator with the confidence to communicate ideas clearly and contribute in dynamic, client-focused environments, consistently delivering reliable and high-quality results.

Education:

➤ Sri Shakthi Institute of Engineering and Technology B.Tech. Information Technology	2023 - 2027 CGPA: 9.00 (Till 5th sem)
➤ PSGR Krishnammal Higher Secondary School For Girls <i>Class: XII</i>	2022 - 2023 Percentage: 83%

Projects

★ PROREADY

Abstract : Developed an AI-powered full-stack web application that automates resume generation, personalized learning roadmaps, and project guidance for students. Integrated external AI APIs to convert user inputs into structured, industry-ready outputs. Built scalable backend with Node.js and Express.js and dynamic frontend using React. **Tech:** React | Node.js | Express.js | MongoDB | AI API Integration | MERN Stack (github) (Linkedin)

★ INTELLIGENT PUBLIC TRANSPORT SYSTEM

Abstract : Built a simulation-based backend system for real-time bus tracking, ETA prediction, and crowd analysis using Java and Spring Boot. Implemented multithreading to concurrently simulate bus movement across multiple routes without GPS dependency. Exposed structured transport data through RESTful APIs, enabling real-time decision-making for end users. **Tech:** Java | Spring Boot | REST API | Multithreading | System Design (github)

★ TASK MANAGER - CONSOLE BASED APPLICATION

Abstract : Developed a Java console-based Task Manager supporting add, update, delete, and view operations through a command-line interface. Implemented input validation and modular OOP design using Java Collections for efficient task handling and clean program flow control. **Tech:** Java | Collections Framework | OOP (github) (Linkedin)

★ LIGHTLINE (JAVA ANDROID APP)

Abstract : Built LightLine, a lightweight Android application enabling video calling with simultaneous flashlight support during rear camera usage. Implemented camera switching, meeting link sharing, and real-time collaboration features. Focused on performance optimization and intuitive mobile UI design. **Tech:** Java | Android SDK | Mobile UI Design (github) (Linkedin)

Skills

Programming Languages: C, Java, C++

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, Express.js, Spring Boot

Database: MongoDB, MySQL

Tools & Platforms: Git, Github, Figma, Adobe XD

Languages known : Fluent in English and Tamil.

Achievements & Certifications:

- ✓ Solved **350+ problems on LeetCode** covering DSA fundamentals — Arrays, Strings, and Matrices — through advanced topics including Dynamic Programming, Trees, Graphs, and Backtracking.
- ✓ **Event Co-ordinator for Kalam 2025**, leading and managing department-level activities at Sri Shakthi Institute of Engineering and Technology.
- ✓ **Secured 3rd place in Design Odyssey (Apr 2024)** conducted as part of Kalam 2024 at Sri Shakthi Institute of Engineering and Technology.
- ✓ **Completed professional certifications**, including **Great Learning – Java**, **TCS iON Young Professional**, **Lean Six Sigma Yellow Belt (96%)**, **Great Learning – UI/UX**, and **NPTEL Elite in Cloud IoT Edge ML (65%)**.
- ✓ Actively participated in **KPR Intercollege Fiesta 2026**, attended technical workshops and competing in a hackathon, enhancing skills in collaboration, innovation, and practical software development.
